

# TELEX LINK

LOW COST ACCESS TO TELEX

TELEX LINK transforms your Prestel set into a telex terminal capable of sending telexes anywhere in the world - and receiving them too! There is no need to invest in expensive special equipment and telex lines, so the savings can be substantial. Just look how little it costs to send a telex of 100 words to different parts of the world:

Only            50p to UK destinations  
                  £1 to the Rest of Europe  
                  £2 to North America  
and              £3 elsewhere in the world  
                  AND RECEIVING TELEXES IS FREE!!

You can even telex the QE2, and other ships served by InMarSat, at £5 a message.

All prices are exclusive of VAT and in addition to normal Prestel and telephone charges.

## BENEFITS

TELEX LINK is ideal for the individual and the organisation that does not send many telexes and cannot justify having their own terminal and line. It's also a great deal more convenient to use than the company telex room! Telexes can be sent and received at our convenience, not someone else's.

## IT'S EASY TO USE - HERE'S HOW

Dial into Prestel in the normal way, and log on with your confidential passwords.

Call up TELEX LINK by going to page 8, where you'll find full instructions.

Select the country of destination for your telex from an A to Z list.

Type in the telex number you want to reach, and then compose your message. You can edit it before you send it.

Prestel will transmit your message over the telex network (trying several times if necessary) and let you know when it's been delivered via Mailbox.

Incoming telexes are sent to a central telex number, quoting your Mailbox number as a reference. Telex Link then delivers them into your own personal mailbox. You will find them there when you read your mail, and Prestel will tell you if you've any mail waiting whenever you log on or off the system.

## WANT TO KNOW MORE?

Then just pick up the 'phone and dial our sales team on 01-822 1100 - they'll be glad to answer all your questions. If you already use Prestel, then just key \*8# to start using TELEX LINK.
