PRODUCT GUIDE

TANDATA PRINTERS

TANDATA PRINTERS ARE FITTED WITH SPECIAL SOFTWARE TO GIVE FULL PRESTEL COMPATABILITY. THIS MEANS THAT YOU CAN PRINT PAGES WHICH INCLUDE GRAPHICS. WITHOUT THIS SPECIAL SOFTWARE STANDARD PRINTERS WOULD NOT BE ABLE TO REPRODUCE PRESTEL GRAPHICS AND MAY INTERPRET THEM AS COMMANDS.

THE TANDATA RANGE OF PRINTERS ARE BASED ON TOP NAME MANUFACTURER'S MODELS WITH THEIR FULL BACKING TO ALLOW TANDATA TO OFFER YOU HIGH LEVELS OF SERVICE AND RELIABILITY.

MODEL: TP182

RRP £299.00

-----  
This printer is a fast, high quality dot matrix printer that can print either Prestel viewdata graphics or 80 column ASCII text. The TP182 is friction or sprocket fed and is suitable for either fanfold or roll paper. An optional roll holder is available for £30.00 rrp which gives easy "print and tear off" use for busy locations. The TP182 can print in "near letter quality" mode at 40 characters per second or 155 characters per second bi-directional. The TP182 is suitable for regular printing requirements and has low running costs.

MODEL: TP320

RRP £399.00

-----  
This printer retains all the standard OKI Microline features as well as being Prestel viewdata compatible. The TP320 has many advanced features including the automatic facility to "park" one type of paper and automatically load another so that you can easily print on a single sheet such as a letter-head and revert to cheaper tractor fed fanfold continuous stationery in seconds. The TP320 is faster, giving 300 characters per second top speed and a fast 62 characters per second "near letter quality." The TP320 has a simple operator front panel and it's set up is easily changed via the internal menu. The TP320 includes a buffer to speed up your terminal, especially when using secure print. For applications which require constant use of single sheets, a cut sheet feeder is available to enable automatic feeding and customised print outs.  
TP320 and Cut Sheet Feeder RRP £519.00

MODEL: TP122

RRP £199.00

-----  
Some Tandata terminals such as the TD1000P require a special version of printer. The TP122 is a budget priced printer with a tractor feeder included for continuous stationery and has 5 different fonts selectable from the front panel. The TP122 gives 120 characters per second draft mode and 24 characters per second in correspondence quality. This printer is capable of 80 column ASCII also, although Tandata Adaptors such as the TD1000 or TD1400 only output 40 column Prestel viewdata pages.

ALL TANDATA PRINTERS ARE PARALLEL CENTRONICS AND COME COMPLETE WITH THE CORRECT LEAD AT 1.25METRES LONG (NOMINAL) TO CONNECT TO YOUR TANDATA TERMINAL. LONGER PRINTER LEADS AND PRINTER SWITCH BOXES TO ENABLE ONE PRINTER TO BE SHARED BETWEEN SEVERAL TERMINALS ARE AVAILABLE FROM TANDATA ON REQUEST. SUFFICIENT FANFOLD PAPER IS ALSO INCLUDED TO GET YOU STARTED AND TANDATA CAN SUPPLY YOU WITH ALL YOUR PRINTER PAPER AND RIBBON NEEDS.
